

prevent. educate. empower.

Please consider donating just \$20 today to
the National Kidney Foundation of Illinois.

It will help more than you know.

Whether you participated in a KidneyMobile® screening, attended a special event or took part in an educational program, we hope that the National Kidney Foundation of Illinois (NKFI) changed your life for the better. Please consider improving the lives of others in Illinois by making a gift today.

With the growing incidence of obesity, especially in children, the prevalence of diabetes and high blood pressure, and the increasing wait for a kidney transplant, the National Kidney Foundation of Illinois desperately counts on your generosity to keep our unique and critical programs free and accessible to the public, especially for those who are in need of these services the most.
