

National **Kidney** Foundation®

of Illinois

The National Kidney Foundation of Illinois improves the health and well-being of people at risk for or affected by kidney disease through prevention, education and empowerment.

Your kidneys play the important role of cleaning your body's blood and removing waste and excess fluid. Every 30 minutes, your kidneys filter all the blood in your body, acting as your body's natural filtration system. Kidney disease is characterized by a gradual loss of kidney function over time, and kills more than 90,000 Americans every year. ***1 in 3 American adults is at high risk for developing kidney disease.***

KidneyMobile® Health Screenings

The KidneyMobile is the nation's first mobile screening and education vehicle for kidney disease, diabetes and high blood pressure. It travels throughout Illinois, focusing on medically underserved communities to provide comprehensive early detection screenings and education to individuals considered most at risk.

Patient Education & Professional Programs

Throughout the year, various educational programs and support are provided for individuals living with or at risk for kidney disease, their families and caregivers. Additionally, hundreds of healthcare professionals in Illinois belong to the National Kidney Foundation of Illinois Professional Advisory Board and medical councils, all of whom develop educational programs for their members and work with the foundation's staff and committees to provide information, education and programs for patients.

Public Education & Advocacy

Through national awareness days and public education events, the National Kidney Foundation of Illinois advocates on behalf of patients throughout the state. Working with legislative partners guarantees thoughtful policies are in place for individuals living with kidney disease as well as dialysis patients and transplant recipients. Additionally, teaming up with healthcare providers and sharing the latest treatment information and practices ensures patients receive the best possible care.

Join us to prevent kidney disease, educate the public about risk factors and empower patients and their families to live healthier lives!

Prevent. Educate. Empower.

We invite you to partner with the National Kidney Foundation of Illinois by sponsoring our programs and events. Your support will help 1.1 million people in Illinois living with kidney disease and give hope and support to patients and their families. Join us in the fight against kidney disease!

World Kidney Day

March 9, 2017 – Location TBD

Held during National Kidney Month, World Kidney Day aims to raise awareness of kidney disease and its precursors. World Kidney Day includes a large-scale, comprehensive screening for kidney disease, diabetes and high blood pressure and a kidney disease prevention, education and awareness campaign in cooperation with World Kidney Day Partners.
