

How is the National Kidney Foundation of Illinois Making an Impact?

In 2017, thousands of people in Illinois received resources in kidney disease prevention, education and empowerment – the building blocks to improving kidney health.

 **61**
Free screenings provided around the state of Illinois.

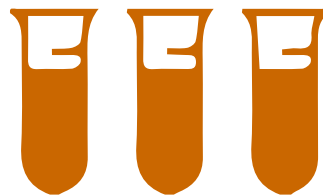

3,621
Illinoisans tested for common risk factors. 

Of those tested...

72,871
people received education about the risks of kidney disease through programs and online resources.

\$60,000
granted to a promising researcher who is motivated to find the link between kidney disease, phosphate levels and heart disease.

357
patients and caregivers attended educational seminars to learn how to manage their disease.

4,000
patients, family members and friends came together as a community for a health fair and three-mile walk to show solidarity in the fight against kidney disease.

359 
renal professionals participated in debates, networking events, workshops and continuing education, strengthening the field of nephrology.

Randy Adamsick has polycystic kidney disease (PKD). PKD is a genetic disease, so he knew that a living kidney donation from a family member was not an option.

Randy reached out to the National Kidney Foundation of Illinois looking for support and information. We mentioned that our upcoming event, Walk for Kidneys, would be a great way for him to meet others dealing with similar health situations and to get information about organ donation and other treatment options. He formed a walk team, Adamsick's Avengers, raising awareness about kidney disease and funds for the Foundation.

At the Walk, Randy and his team posed for photos, as our walk teams do, and following the Walk, he posted the photo below on Facebook, explaining his situation – a dire need for a kidney. A man whom Randy had not seen in over 20 years reached out, letting him know that he would be willing to donate his kidney if they were a match. As luck, or perhaps fate, would have it, they were, and Randy is now living a happy, healthy and fulfilling life with his longstanding friend's kidney.

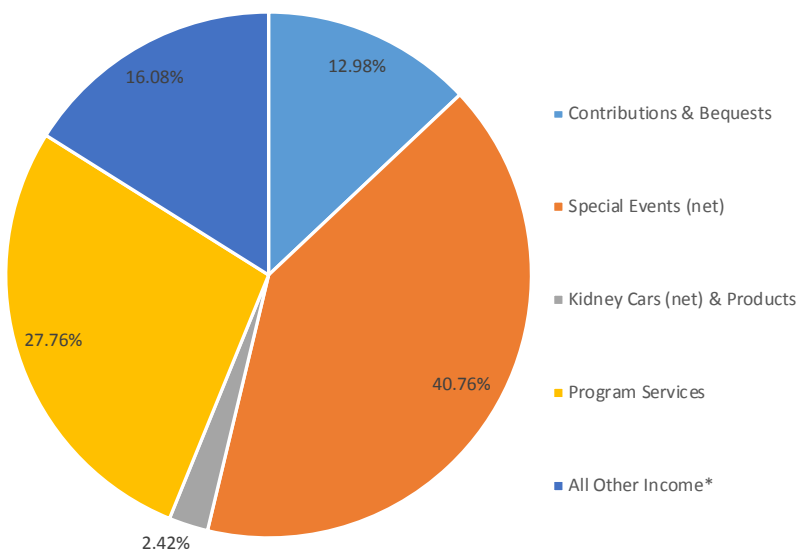

It is impossible to know what would have happened had Randy not reached out to the National Kidney Foundation of Illinois, and unfortunately, his story is not unique. That is why we are here: to provide support, **education**, **prevention** and **empowerment** to individuals like Randy and hundreds of thousands of people throughout our state with kidney disease. With generous support from people like you, we look forward to continuing with that mission in mind.

FINANCIALS

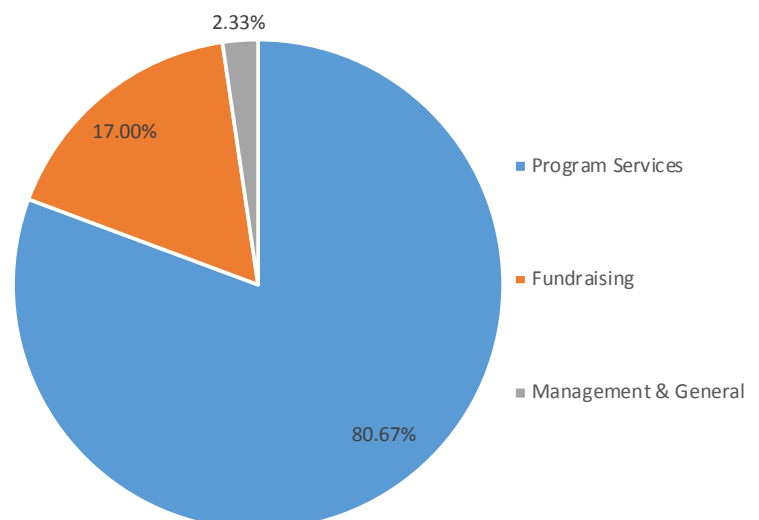

April 1, 2016 - March 31, 2017

Revenue
\$2,162,945

* Includes Investment Return of \$347,726

Expenses
\$1,622,137

CORPORATE SUPPORTERS

Thank you to the thousands of individuals, corporations and foundations who made generous donations between April 1, 2016-March 31, 2017 to support kidney patients and their families through our programs, services and initiatives.
